

Daily Fuel — Prototype Style Guide & Handoff (for Soph)

Core Product Principle

Tagline: Make the most of how food feels today.

This product is built around a key insight:

This is about a person's relationship with food *today* — because it changes, especially for GLP1 users.

Everything — layout, visuals, and interaction — should reinforce:

- flexibility
 - non-judgment
 - real-life behavior
 - day-by-day adaptation
-

1. Landing Screen

Hero Copy: Make the most of how food feels today. Eating feels different now. Daily Fuel helps you work with it — day by day.

Image: Daily-Fuel_Landing-screen

Layout Guidance:

- Full-width illustration
 - Copy layered cleanly (left or center)
 - Calm, open, not crowded
-

2. Goals Screen (Input Screen)

Image: Daily-Fuel_Goals-input-screen

Illustration Behavior:

- Person anchored LEFT (~30–35% width)
- Holding a notepad / writing
- Represents *intentional setup*

Layout:

- LEFT = illustration
- RIGHT (~65–70%) = form inputs

👉 This is critical: the UI must dominate the right side

Emotional Goal:

"I'm setting this up — this is manageable"

3. Go-To's Screen

Image: Daily-Fuel-go-to-selection-screen

Illustration Behavior:

- Person on LEFT (~30–35%)
- Reaching toward a shelf
- Shelf contains simple food items

Layout:

- LEFT = illustration (anchored)
- RIGHT = selectable UI / options

Concept:

This represents **real behavior** — not planning

👉 "These are the things I grab without thinking"

4. Food Selection Screen (Will Eat / Won't Eat)

Image: Daily-Fuel_full-background

Visual Approach:

- **NO person**
- Background-only illustration
- Floating food elements

Implementation:

Use same image but:

- apply **overlay (cream tint)** OR
- reduce opacity (light)

Optional:

- slight blur (1–2px)

Layout:

- UI should dominate
- background should be felt, not noticed

Copy:

What sounds doable right now? Tap anything you'd actually consider

5. Supplements Screen

Image: Daily-Fuel_Supplements

Illustration Behavior:

- Person on LEFT (~30–35%)
- Drinking water (glass tilted up)
- Supplements visible but subtle

Layout:

- LEFT = illustration
- RIGHT = supplement inputs

Concept:

Action-based, not symbolic

👉 "This is just part of my day"

6. Celebration Screen

Image: Daily-Fuel_Celebration-screen

Copy:

You've got [X], [Y], and [Z] in your corner. That's more than enough to work with.

Every day, tell us how eating feels — and we'll build your Daily Fuel from there.

Illustration Behavior:

- Full illustration
- Person jumping / arms up
- Upward motion

Concept:

👉 "I've got what I need"

Daily State Selector

Feeling good — food feels doable Not hungry — but I'm okay Rough day — keep it simple

Supporting Microcopy:

Today I'm... This can change — just pick what fits today

Daily Plan Structure

Start Easy If/when you're hungry If today's been a bit harder Tiny Wins Count

Dynamic Closing Copy

These images should swap dynamically with the selected state — they are part of the feedback loop, not static assets.

Feeling good

It's a good day for a good day. Let's make the most of it.

[image: Daily-Fuel_Feeling-good]

Not hungry

Not hungry happens. We'll work with that.

[image: Daily-Fuel_Not-hungry_1]

Rough day

Getting something in is enough today. You're on the right track.

Feedback Button

Did anything here feel doable?

Visual System Rules (Important)

Illustration Weight System

Full Illustrations (Hero)

- Landing
- State screens
- Celebration

Partial (Left-anchored)

- Goals
- Go-To's
- Supplements

Background Only

- Food selection
-

Layout Rule (CRITICAL)

For all LEFT-figure screens:

- Illustration = LEFT 30–35%
 - UI = RIGHT 65–70%
 - Never center the figure
 - Never let illustration compete with form
-

Color + Tone

- Cream backgrounds
- Soft greens
- Goldenrod accents
- Deep navy text

Avoid:

- harsh contrast
 - bright saturated colors
 - clinical tones
-

Emotional Guardrails

The product should NEVER feel:

- like a diet app
- clinical n- judgmental
- overly cheerful

It SHOULD feel:

- calm
 - adaptive
 - capable
 - supportive
-

Final Note

This is not about perfect eating.

This is about: 👉 helping people work with how food feels *today*

Everything — layout, visuals, and interaction — should reinforce that.
